

Day 4: Statistics for ML

Name: Manish Giri

Registration Number: 137256

Email: manishgiri8101@gmail.com

Date: 18-06-2026

Assignment, 5 Questions Submit before 20 June 2026:

1. What have you learnt from the Titanic Disaster?

Ans: The Titanic disaster taught us that preparation, safety measures, and quick decision-making are very important. It also showed that factors such as gender, age, and passenger class affected survival chances.

2. Distractions are dangerous, elaborate.

Ans: Yes, distractions can be dangerous because they reduce awareness and delay important actions. In critical situations, even a small distraction can lead to poor decisions and serious consequences.

3. Stakeholders should be kept informed, yes/no.

Ans: Yes, Keeping stakeholders informed helps build trust, improves coordination, and ensures everyone can make timely decisions based on accurate information.

4. Traceability is essential, what do you think?

Ans: I think traceability is essential because it allows us to track decisions, actions, and data sources. It helps identify mistakes, improves accountability, and makes analysis more reliable.

5. Documentation may have lasting benefits, true or false and why?

Ans: True, Documentation preserves important information for future reference. It helps others understand past decisions, learn from experiences, and continue work without losing valuable knowledge.
